Sales Engineer

Experience

Software Engineer III - Synapsefi, San Francisco

July 2019 - October 2023

- Created monthly bank statements for cash management brokerage accounts in a large batch, which was a scheduled parallel task.
- Successfully migrated 10k+ accounts from the legacy banking system to the new brokerage account system.
- Maintained and contributed to core API microservices, including a React.js component library.
- Processed large batch jobs for internal reports, along with reports related to the liquidation of cryptocurrency accounts.
- Created a client setting module for dashboards, allowing platforms to manage user permissions and set financial limits for bank accounts.

Contract Frontend Engineer for various companies - Lion Interactive - Britelite Immersive - ViewFind - Brightedge, San Francisco

March 2015 - July 2019

- Created web apps with React.js and integrated them with Django admin and rest APIs.
- I iterated on projects with design and backend teams to deliver finalized products in line with client expectations.
- Contributed to UI component design systems.
- Created interactive multi-media editorial webpages utilizing sound, images, and video.

Sales Associate - Sprint Nextel

November 2013 - February 2015

- Developed sales strategies to meet & exceed monthly sales quotas
- Guide customers through sales process, and troubleshoot issues.
